

## Tree planting at Lake Louisa State Park Planting schemes by color

Yellow = sandhill; 50 each tubeling longleaf, turkey oak, bluejack oak, plus 25 sand live oak per acre

White = sandhill; same as yellow, but areas are burned 2021

Purple = sandhill; omit pines since there are plenty, but same oaks per acre

Green = flatwoods; plant 50 tubeling longleaf per acre, no oaks

Pink = developed areas, no planting

Roads are also purple, white lines are zone boundaries, blue line is big creek

Trees will not be planted more than halfway up the hill below cabins and will be planted in patches with large gaps to allow scenic view framing. Detailed plates will follow of each quadrant of the park.
